An *emergency* is a website or email "down" where server access is needed to repair the issue. Depending on the problem, the work may not be fixable out of hours.

If you use an email client such as Outlook, or Gmail/Hotmail etc and *those* emails are not working, or you cannot connect to the server, **but you still have direct access to your webmail via webmail login**, I am not always able to help you out of hours. I will remind of your direct login and you will be able to use your email on the server in the interim.

If you have repeatedly triggered malware, do not protect your home laptops, ipad from malware or viruses and the issue is a direct result of this behaviour, again I am not able to help you outside work hours.
